

**Chapter 10**

**Community  
Facilities Plan**

**The Town of New Carlisle** has a number of departments, organizations and agencies that provide community services and facilities to residents and businesses. These community facilities and services are an essential piece to the overall quality of life for New Carlisle residents and the local business climate. This chapter of the Comprehensive Plan highlights key community facilities in the community and provides recommendations to ensure their maximized locations within the community. Community facilities and services include those “public” uses provided by the municipality, other governmental agencies and districts, organizations, and religious institutions. While some recommendations for new facilities and improvements are provided, much of this chapter reflects existing facilities.
